ABOUT ALEXANDER

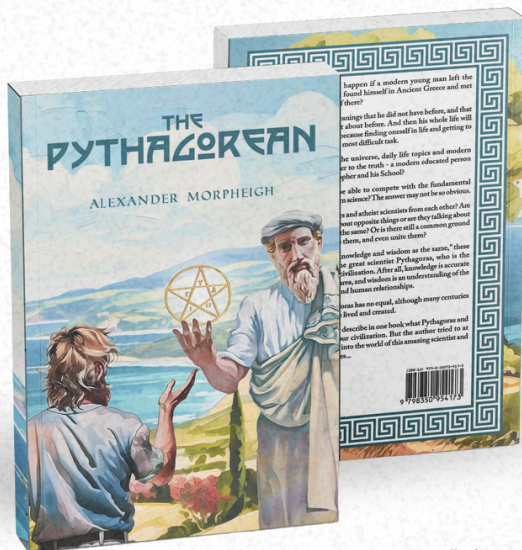

Alexander Morpheigh, born on April 29, 1972, is a professional with a unique blend of expertise in science, engineering, business, and philosophy. Married with two children, Alexander's academic foundation began with extensive studies in physics and astronomy. While initially pursuing a career in astrophysics, he ultimately earned a Master's degree in Engineering and a degree in Business Development from the State Maritime University.

With over three decades of experience in industrial automation engineering, Alexander has been at the forefront of innovation in this field. Since 2005, he has served as the CEO of a group of technology companies specializing in industrial automation and robotics, driving advancements in cutting-edge technologies.

Beyond his professional achievements, Alexander has cultivated a deep passion for ancient Greek culture. Since 2012, he has dedicated himself to the study of ancient Greek philosophy. This journey led him to contract a professional film crew in 2017 to create a documentary, investigating the legacy of Pythagoras and his modern followers. While the documentary remained unreleased, the project unearthed intriguing discoveries, including the existence of three secret Pythagorean orders comprised of contemporary scientists, such as mathematicians, physicists, and astronomers.

In 2024, Alexander's passion for storytelling and philosophy culminated in the publication of "The Pythagorean". This science fiction novel weaves together his research and insights, presenting a captivating narrative inspired by the teachings and legacy of Pythagoras in a modern context.

THE PYTHAGOREAN

PRAISE FOR THE PYTHAGOREAN

"This is an amazing read! It's thoughtful and a real page turner with strong pacing and character development. Highly recommended!!!"

—Amazon Review

"This book is a really interesting mix of real Greek philosophy, modern science, and adventure. It's smart but still easy to read, with a nice touch of romance in the story."

—Amazon Review

The protagonist, a young man named Theodore, is about 36 years old and resides in Athens. Following a car accident, he finds himself in the body of a young man from Ancient Greece who attempted suicide. Confused about his whereabouts, Theodore sets out to find people and seeks guidance from the Delphic Oracle – Pythia.

Pythia reveals to Theodore that he must meet his true teacher, who alone can return him to his own time. To prepare spiritually for this encounter, Theodore's best bet is one of the greatest teachers of European civilization – Pythagoras, who coincidentally lives during that era. Theo seeks out Pythagoras and becomes his student. Throughout his education, Pythagoras explains to Theodore why he ended up in the past and the significant mission awaiting him in the future. In the process, Pythagoras imparts a wealth of intriguing facts to Theodore, blending authentic Pythagorean teachings with alternative viewpoints from contemporary science.

Theodore's beloved Elena remains in Athens, and his lack of attention towards her weighs heavily on him. Through his studies, Theodore learns the practice of lucid dreaming, enabling him to communicate with Elena in his dreams and share his experiences. In a critical turn of events, Theodore steals a bottle of expensive wine, leading to his arrest. Pythagoras intervenes, securing his release on bail. However, Theodore learns he can only remain on the island for a month. With his limited time, he must pass an interview with the local ruler. In another lucid dream, Theodore meets Alkeus, the young man from ancient Greece, who now inhabits his body in the present. Alkeus' adaptability to modern life is hindered by amnesia, and he relies on others to remind him of his past.

As Theodore's training progresses, Pythagoras not only introduces alternative, scientifically backed perspectives on the Universe's structure and the existence of parallel worlds but also takes him on journeys to explore them. Theo's situation becomes dire – execution awaits him if he stays in the past, while arrest and imprisonment await him in the future. In a lucid dream, he encounters his future self in a café, realizing that his true teacher is none other than himself. Spiritual purification is the key to his return to the present. Is he prepared to embark on his crucial mission?
